Brand New Book ***** Print on Demand *****.Excerpt from Talks on Psychology: Applied to Teaching for Teachers and Normal Institutes This little book on the elements of applied Psychology has been written for the sole purpose of helping the teacher in preparing for more effective work in the school-room. Many instructors in our common and graded schools are familiar with the branches they teach, but deficient in knowledge of the mental powers whose development they seek to promote. But no proficiency in science or art that does not include the study of mind, can ever qualify the student for the work of the teacher. He must comprehend fully not only the objects studied by the learner, but the efforts put forth in studying them, the effect of these efforts on the faculty exerted, and their results in the form of accurate knowledge. How can the teacher deal successfully with these fundamental facts of Psychology, without having first mastered them himself? Indeed, it is urged by eminent educators everywhere that a knowledge of the branches to be taught, and a knowledge of the mind to be trained thereby, are equally essential to successful teaching. Permit me to add a few suggestions as to the method you pursue in studying the subjects presented in this small volume.
