## NEW METHODS OF FOOD PRESERVATION

DOWNLOAD

Book Condition: New. Publisher/Verlag: Springer, Berlin | The major techniques employed for food preservation have a long history of use. They include chilling; freezing; drying; curing; canning; fermenting or otherwise acidifying; the addition of preservatives; heat pasteurisation and sterilisation. Newer techniques more-or-less derived from these traditional procedures include the successful application of combined preservation or 'hurdle' methods, vacuum- and modified atmosphere-packaging, and continuous sterilisation coupled to aseptic packaging. More innovative techniques, such as the use of ionising radiation, are increasingly being employed. At the same time, there is a reawakening of interest in even more radical approaches. The reasons for this derive principally from consumers' requirements for foods that are higher in quality, so less severely processed; more natural, so less heavily preserved; nutritionally healthier, so containing less salts, sugars and fats; and, with respect to food poisoning, with retained, or preferably improved, assurance of safety. | 1 Principles and applications of hurdle technology.- 1.1 Introduction.- 1.2 Examples of the hurdle effect.- 1.2.1 Fermented foods.- 1.2.2 Shelf stable products (SSP).- 1.2.3 Intermediate moisture foods (IMF).- 1.3 Behaviour of microorganisms during food preservation.- 1.3.1 Homeostasis of microorganisms.- 1.3.2 Multi-target preservation of foods.- 1.3.3 Stress reactions and metabolic exhaustion.- 1.4 Total quality of foods.- 1.4.1 Optimal range of hurdles.- 1.4.2 Potential safety and quality hurdles.- 1.4.3 User guide to food design.- 1.5 Application of hurdle technology in less developed countries.- 1.5.1 Fruits of Latin America.- 1.5.2 Dairy product of India.- 1.5.3 Meat products of China.- 1.6 Future potential.- References.- 2 Bacteriocins: natural antimicrobials from microorganisms.- 2.1 Introduction.- 2.1.1 Historical.- 2.2 Bacteriocin structure and function.- 2.2.1 Lantibiotics.- 2.2.2 Small heat-stable bacteriocins.- 2.2.3 Large heat-labile bacteriocins.- 2.3 Genetics of bacteriocins from LAB.- 2.3.1 Genetic organization of bacteriocin operons.- 2.3.2 Genetic location of bacteriocin genes.- 2.4 Application of bacteriocins in food systems.-...
