### ***Reviews***

*It is just one of my personal favorite books. I was able to comprehend every little thing out of this published publication. It is extremely difficult to leave it before concluding, once you begin to read the book.*

Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Security in the Boardroom: The Attack on Business and What Executives Need to Know and Do About it. By Mark S.A. Smith Who needs a book about security? More small businesses are attacked than homes. Seventy percent of corporate break-ins are motivated by money or political reasons. The other 30 percent are random attacks to grab what ever unsecured assets are available and cash in on your hard work. Sadly, more than half of the successful attacks on businesses come from disgruntled employees, fired staff, temporary workers, and opportunists. The rest comes from organized criminals aiming to clean you out. These perpetrators want to pilfer your proprietary property, cheat your customers, hinder your employees, and attack the heart of your business - your information systems and your vital physical assets. The good news is that security technology is more affordable and more reliable then ever. The bad news is that the bad guys are more clever and vicious then ever. This book is about protecting your resources, your infrastructure, and your customers. If you re going to make smart decisions, you need to get answers to these security questions: If you re a CEO, COO, President, or Owner - What are the threats to your organization? What are the risks and the costs of these threats? What would happen if critical business information or assets were compromised? How do you direct the people who will lead your security efforts? If you re a CFO or VP of Finance - What is the impact of security on corporate compliance and your cash flow? What do regulations demand from you? At what cost is it worth it?...
