From the acidic effects of the atrocious Pepsi, to the sugary sweetness brought about by chocolate, its pain knows no bounds. Immersed in darkness, it's rare for a tooth to see the light. Living a solitary life, each day blends into the next without the hope of seeing something new. Death and decay is a certainty many see on a day to day basis. Survival is the key to living a long, pain-free life. When that very option is threatened, it's the tooth's obligation to make his beloved caretaker see the light. The hope of garnering a longer lifespan is a must, as is a trip to the dentist. The question is, how can one measly tooth bring about a much needed change without causing any further pain in the process?.
