Paperback Pages Number: 120 Language: Simplified Chinese Publisher: Water Resources and Hydropower Press; 1st edition (February 1. 2009). 2007 Water advanced and practical technology focuses on promotion of guidance Directory published by the Water Resources and Hydropower Press. the content include: large channel concrete mechanized lining technology and equipment. mixing deep underground diaphragm wall construction equipment. rockfill density determination of the dynamic parameter method. the alpine region have dam diversion headworks design of new technologies. such as thick (multi-axis) dig mix cement Soil Cutoff Wall Construction Method. compression of dispersed unbonded prestressed anchor cable the FD2000 distributed intelligent dam hidden integrated detection system. and root stone. river training works intelligent detection system. flood control steel piles and fast spin pile driver. etc. Contents: the mechanization of large-scale channel concrete lining technology and equipment deep mixing underground continuous wall equipped with rockfill density determination of the dynamic parameter method alpine region of thick (multi) dig mix the cement soil impervious wall of the dam diversion headworks design of the new technology Construction method of compression intelligent distributed unbonded prestressed anchor...

Reviews

Great electronic book and valuable one. It really is simplistic but surprises within the fifty percent from the book. Its been printed in an extremely simple way in fact it is merely right after i finished reading this publication by which in fact modified me, change the way i really believe.

-- **Dr. Bethany Lindgren**

This type of publication is almost everything and helped me looking forward and much more. I am quite late in start reading this one, but better then never. You wont really feel monotony at whenever you want of your own time (that's what catalogs are for relating to if you ask me).

-- **Prof. Buddy Leuschke**
