

Interpolation

By J. F. Steffensen

Dover Publications. Paperback. Book Condition: New. Paperback. 270 pages. Dimensions: 8.4in. x 5.4in. x 0.7in.ln the mathematical subfield of numerical analysis, interpolation is a procedure that assists in reading between the lines in a set of tables by constructing new data points from existing points. This rigorous presentation employs only formulas for which it is possible to calculate error limits. Subjects include displacement symbols and differences, divided differences, formulas of interpolation, factorial coefficients, numerical differentiation, and construction of tables. Additional topics include inverse interpolation, elementary methods of summation, repeated summation, mechanical quadrature, numerical integration of differential equations, the calculus of symbols, interpolation with several variables, and mechanical cubature. 1950 edition. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.

Reviews

Excellent eBook and useful one. It can be rally fascinating through looking at period. You can expect to like just how the blogger create this publication.

-- Myrl Schmitt

Certainly, this is the finest job by any publisher. I was able to comprehended almost everything out of this published e ebook. You wont truly feel monotony at at any moment of the time (that's what catalogues are for concerning should you question me).
