NEW TRENDS IN THE DIAGNOSIS AND THERAPY OF NON-ALZHEIMER'S DEMENTIA

Book Condition: New. Publisher/Verlag: Springer, Wien | Dementia is an acquired disorder of higher cerebral functions and cognition. Because of increasing life expectancy dementia poses a major health and socio economic problem. Alzheimer's disease accounts for 70-90% of mental decline in the elderly. Degenerative non-Alzheimer's dementias are responsible for 7-30%. These include a variety of disorders clinically characterised by progressive cognitive dysfunction often combined with focal neurological deficits, e.g. Parkinson-plus syndromes, Lewy body dementia, lobar and multisystem atrophies, other neurodegenerative disorders, and prion diseases. Often it is difficult to distinguish these illnesses from Alzheimer's disease and vascular dementia. In spite of considerable progress in molecular genetics, biochemistry, and neuropathology, the classification and pathogenesis of non-Alzheimer's dementias are still debatable. Diagnosis is frequently made only at postmortem. Because disease markers are not available for the majority of non Alzheimer's dementias, consensus criteria for the identification of such diseases are warranted. These criteria could serve as a basis for early diagnosis and distinction from other dementing disorders. | Structural basis of dementia in neurodegenerative disorders.- Cytoskeletal pathology in non-Alzheimer degenerative dementia: new lesions in Diffuse Lewy body disease, Pick's disease, and Corticobasal Degeneration.- The neuropathologic diagnostic criteria of frontal lobe dementia revisited. A study of ten consecutive cases.- Cognitive deficits in non-Alzheimer's degenerative diseases.- The neurochemistry of Alzheimer type, vascular type and mixed type dementias compared.- Clinical features of frontal lobe dementia in comparison to Alzheimer's disease.- Frontal lobe dementia and motor neuron disease.- Clinical and pathological characteristics of primary progressive aphasia and frontal dementia.- MR-imaging of non-Alzheimer's dementia.- Functional imaging techniques in the diagnosis of non-Alzheimer dementias.- Quantitative EEG in frontal lobe dementia.- Vascular dementia: perfusional and metabolic disturbances and effects of therapy.- The spectrum of depressive pseudo-dementia.- Molecular biology of APO E alleles...
